EnergyWire -- Fri., June 21, 2013 -- Read the full edition

1. HYDRAULIC FRACTURING: EPA abandons investigation into Wyo. water contamination

U.S. EPA has abandoned its investigation of groundwater contamination near oil and gas operations in Wyoming. The agency will not seek peer review and will not finalize its 2011 draft report that linked hydraulic fracturing to contaminated groundwater near the town of Pavillion. Instead, the state will carry on the investigation with the help of a \$1.5 million grant from Encana Oil & Gas Inc. -- the company accused of contaminating the water.

THIS MORNING'S STORIES

2. MARKETS: Natural gas still 'stubbornly resistant to globalization' -- IEA
3. CLIMATE: IEA head economist urges efficiency push in energy sectors
4. NATURAL GAS: USGS finds natural methane in Pa. water
5. PIPELINE SAFETY: Alberta suffers three spills in June
6. OIL AND GAS: Adjusting federal royalty rates to mirror state rates would raise millions -- report
